

IN THE CLAIMS:

Please amend claim 1 as follows:

1. (Currently Amended) A recording/reproducing apparatus comprising a reservation means for setting up a timer reservation program, a recording means for performing recording operation on the basis of ~~[[a]]~~ one set-up timer ~~recording reservation~~ program, and an additional reservation means for concurrently setting up another one timer reservation program while ~~a timer reservation is~~ said recording means continuously ~~kept~~ performing said recording operation according to said one set-up timer reservation program.
2. (Original) A recording/reproducing apparatus claimed in Claim 1, wherein said additional reservation means sets up a recording start time on the basis of an end time of a program currently in the course of recording.
3. (Original) A recording/reproducing apparatus claimed in Claim 1, wherein said additional reservation means sets up a new timer reservation program by displaying a timer reservation program currently in the course of recording and correcting said timer reservation program.
4. (Original) A recording/reproducing apparatus claimed in Claim 1, wherein said additional reservation means sets up a timer reservation on the basis of an input code information.
5. (Previously Presented) A recording/reproducing apparatus claimed in Claim 1, wherein said additional reservation means sets up a timer reservation program by displaying a timer reservation program currently in the course of recording and correcting said timer reservation program, and said recording means continues recording on the basis of said corrected timer reservation program.
6. (Previously Presented) A recording/reproducing apparatus claimed in Claim 2, wherein said additional reservation means sets up a timer reservation program by displaying a timer reservation program currently in the course of recording and

correcting said timer reservation program, and said recording means continues recording on the basis of said corrected timer reservation program.

7. (Previously Presented) A recording/reproducing apparatus claimed in Claim 3, wherein said additional reservation means sets up a timer reservation program by displaying a timer reservation program currently in the course of recording and correcting said timer reservation program, and said recording means continues recording on the basis of said corrected timer reservation program.
8. (Previously Presented) A recording/reproducing apparatus claimed in Claim 4, wherein said additional reservation means sets up a timer reservation program by displaying a timer reservation program currently in the course of recording and correcting said timer reservation program, and said recording means continues recording on the basis of said corrected timer reservation program.
